

## **ENVIRONMENTAL POLICY**

### **of the company Železiarne Podbrezová**

Our company has been producing high-quality metallurgical products for more than three centuries. In addition to the social, demographic, and cultural environment, its activities also influence the quality of the natural environment.

A permanent priority of the company's top management is to meet customer needs through the production of a wide range of steel products in such a way that all activities, processes, products, and services are ensured with minimal impact on the environment.

#### **To achieve this objective, the company commits to:**

- maintaining and continuously improving environmental management processes with the aim of reducing negative impacts on the environment, achieving continual improvement of environmental performance, and preventing pollution,
- complying with obligations arising from legal regulations and other environmental requirements to which the company has committed itself, and regularly evaluating them,
  - increasing environmental awareness and competence of employees through education and training processes,
  - publishing the environmental policy and demonstrably informing all company employees about it,
- managing a continuous process of reviewing, planning, and achieving environmental objectives defined in the Environmental Management System programs,
- developing relationships and communication with the general public in matters related to environmental protection.

Ing. Vladimír Soták  
Chairman of the Board of Directors
